The Nashville Number System

The **Nashville Number System** uses major scales to figure out which chords to play in a given key.

You start out by writing down a scale, in this case G major.

Then number each note:

1	2	3	4	5	6	7	8
G	A	B	C	D	E	F#	G

The notes numbered **1, 4** and **5** (**G, C** and **D**) will be your major chords for the key of **G**.

Now figure out **the 1-4-5 progression** for other keys on your own.
